TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Google Apps Script
Frontend: React, Next.js, HTML, CSS
Backend & APIs: FastAPI, Django, Spring Boot, REST APIs
AI & Automation: OpenAI API, Gemini API, n8n, ManyChat

Databases: PostgreSQL, Supabase
DevOps & Deployment: Docker, Vercel
Developer Tools: Git, GitHub, Postman, VS Code

WORK EXPERIENCE

Laurus Enterprises PH

June 2022 - March 2024

Facebook Ads Assistant

Ortigas Center, Pasig City

- Engineered a **real-time ad dashboard** using **Facebook Graph API**, reducing reporting time by **70%** and improving ad engagement by **25%**, ROI by **30%**, and conversion rates by **30%** across **₱500K+** in managed ad spend through **A/B testing**, **CPC/ROAS analysis**, and performance-driven optimization, earning **Employee of the Month** recognition (**Aug–Nov 2022**)

LE PAY

March 2024 - April 2025

Web Development Specialist (Promoted from Software Engineer Intern – May 2024)

Remote

- Reduced transaction latency by **35%** by **optimizing Supabase queries and database operations** while developing **RESTful APIs** and digital wallet and transaction-tracking features using **Java, Spring Boot, and Postman**

WiseCare Providers, Inc.

May 2025 - June 2025

Software Development Intern - Head

Salcedo Village, Makati City

- Spearheaded the development of a **web-based insurance system** for policies, claims, and client records using **TypeScript, React, Supabase, and Vercel**, increasing workflow efficiency and record accessibility by **45%**
- Designed and deployed an **insurance-focused website** using **HTML and CSS** with a **built-in automated email sending** using **Python and SMTP**, enhancing responsiveness and overall user engagement by **25%**

Freelance Software Developer — AI, Automation, & Web Development

October 2025 - Present

Self-Employed

Bacoor, Cavite

- Created a multi-channel **AI sales automation platform** using **ManyChat** for Facebook/Instagram conversation flows and **n8n** for API-driven backend workflows, automating lead capture, follow-ups, and live agent routing across web, email, and phone channels, improving response efficiency by **50%**
- Implemented an **AI-powered document summarizer** using **Gemini API, Python, Supabase, and Vercel**, reducing manual review time by **60%**
- Developed a **full-stack ISP billing and subscription system** with authentication, role-based access, automated invoicing, and **Stripe** payment integration using **React, TypeScript, Supabase, and Vercel**, reducing manual billing and payment processing time by **50%**

COLLABORATIVE PROJECTS

AI Email Assistant

2026

An AI-driven email assistant for systemized email generation with context awareness, tone control, and subject optimization built using **React, FastAPI, and OpenAI API**

Patient Referral Management System (C.U.R.A.)

2026

A responsive patient referral management system for UP Manila College of Dentistry, streamlining referral submission, real-time status tracking, and role-based workflows using **TypeScript, React, Supabase, and Vercel**

Radiology Information System (XferDX)

2025

A mobile radiology information system for secure DICOM image management, remote reading, telehealth integration, and automated reporting workflows using **TypeScript, React, Supabase, and Vercel**

Special Problem Information System (S.P.I.S.)

2025

A role-based academic repository system for organizing and retrieving thesis records using **Python, React, Django, and PostgreSQL**

Coffee Shop POS

2025

A point-of-sale system for managing menu items, stock, and transactions using **Spring Boot, Java, PostgreSQL, HTML, and CSS**

Shopping Website

2023

A basic shopping website with add-to-cart, checkout, and product management features for 15+ products developed using **Spring Boot, Java, PostgreSQL, HTML, and CSS**

Cafeteria Inventory System

2022

A live inventory tracking system for a cafeteria with 20+ inventory items built using **Python and PostgreSQL**

EDUCATION

University of the Philippines - Manila

August 2022 - Present

BS Computer Science Major in Statistical Computing

Manila, Metro Manila, Philippines

- Finalist**, SOCOMSCI Hackathon 2024
- Finalist**, GDSC-L Hackfest 2025
- Top 5 Finalist**, SoComSci Tech Week PauTECHan (2025)
- Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, Statistical Computing, Machine Learning

EXTRACURRICULAR ACTIVITIES

Samsung Open-Source Conference (SOSCON) Philippines

Attendee

- Engaged with industry experts and developers in discussions about emerging technologies

UPM Society of Computer Scientists

Member

- Participated in technology-driven projects, events, and student initiative discussions
